

# Atlantic Blacktip Shark

*Carcharhinus limbatus*

They are large sharks, weighing up to 220 pounds (100kg).

They are gray to brown on the back (dorsal) and white underneath (ventrally).

They have a black tip to their dorsal and other fins.

They have small eyes and a pointed snout.

They have sharp teeth.

They have a large tail with the upper lobe much bigger than the lower.
